WorkCoPilot - Feature Catalog

2026-10-25 • COE Security LLC / AdmireVeda

Feature	Category	What it is	What it solved	Surface	Status
Multilingual (16 languages)	i18n	The product and marketing site are available in 16 languages, including full Japanese, Chinese and Korean.	Non-English users understand the guidance; opens global markets.	Product + Site	Shipped
Location-based language auto-select	i18n	On first visit the language is chosen from the visitor's region using professional-language logic (e.g. India/US/UK -> English, Japan -> Japanese).	The right language appears automatically, respecting business-language norms, with no manual switching.	Site	Shipped
Script-aware heading rendering	i18n	Line-height/spacing fixes for Devanagari and CJK scripts.	Hindi/Chinese/Japanese/Korean headings are no longer clipped or cut off.	Site	Shipped
Location-aware SEO (hreflang + localized meta + multilingual sitemap + llms.txt)	SEO	Per-language URLs via ?lang, hreflang + x-default alternates, localized titles/descriptions, a 16-language sitemap, and an llms.txt.	Each language is discoverable and indexable by search engines and AI answer engines.	Site	Shipped
Cookie & privacy consent banner	Privacy/Legal	A GDPR/CCPA-style accept / reject / manage-preferences banner, localized, that gates non-essential cookies on-device until consent.	Lawful, user-controlled consent; privacy compliance for global visitors.	Site	Shipped
Global-standard legal pages	Privacy/Legal	Updated Privacy (GDPR/CCPA sections) plus new Cookie Policy, Subprocessors and Accessibility pages, all linked in the footer.	Meets global compliance expectations and transparency; nothing buried.	Site	Shipped
Admin console gold-standard UI	Admin	A consistent visual/UX system across every superadmin section (tables, toolbars, panels, states).	Removes the patchwork look; a coherent, professional admin experience.	Admin	Shipped
Company admin gold-standard UI	Admin	The same high-quality console treatment for company administrators.	Company admins get a first-class management experience.	Admin	Shipped
Subscribers tab	Admin/Billing	A single view of all paying subscribers with plan, status, MRR, lifetime value and activity.	Clear visibility into paying customers and their operations.	Admin	Shipped
Cancelled (churn) tab	Admin/Billing	A dedicated tab capturing cancelled/churned subscribers, with reason, date and lifetime revenue.	Churn visibility and retained-revenue tracking.	Admin	Shipped
Accounting dashboard	Billing	Revenue and MRR graphs (week/month/quarter/year), finance controls, manual-ledger CRUD, and cancellation controls.	Full finance operations inside the product, with charts and audit.	Admin	Shipped
Accounting role	Admin	A dedicated role that sees Finance, Subscribers and Cancelled only.	Delegate finance operations without granting full superadmin.	Admin	Shipped
Stripe end-to-end + transactional integrity	Billing	Verified Stripe lifecycle with persisted webhook replay-dedupe, correct status mapping, and exactly-once ledger recording.	Reliable, correct billing; no double-charges or double-grants on webhook replays.	Billing	Shipped
Owner subscription alerts	Billing	Email to the owners on every subscription event (new, plan change, cancellation, payment failure).	Owners are notified instantly of every subscription change.	Billing	Shipped
Self-serve upgrade / downgrade	Billing	Customers change plans themselves: upgrades apply immediately with prorated credit, downgrades take effect at the next renewal.	Customers manage their own plan; proration follows financial best practice.	Product + Billing	Shipped
Self-serve cancel + Customer Portal	Billing	Cancel anytime and update the payment method through the Stripe Customer Portal.	Self-service account management; less support load.	Product + Billing	Shipped

Feature	Category	What it is	What it solved	Surface	Status
Monthly invoices in the dashboard	Billing	An invoice list in the user dashboard with hosted-invoice and PDF links.	Customers get their receipts and invoices on demand.	Product	Shipped
Finance timeseries + manual ledger CRUD	Billing	Revenue/MRR timeseries endpoints and manual adjustments with immutable posted amounts, void-with-audit, and Stripe-sourced protection.	Accountants can make adjustments safely with a full audit trail.	Admin	Shipped
Company screenshot-capture policy	Admin/Product	A company-admin toggle controlling whether reports/logs capture screenshots for that company's users.	Company-level control over screen-capture data egress.	Admin + Product	In progress (this release)
Single-session login	Product	One active signed-in location per user at a time.	Prevents credential sharing and concurrent logins.	Product	Shipped
Pre-task interactive coach + guide-window UX	Product	An interactive pre-task coach and refined live guide window (pinned header, analyzing state, reading strip, pause).	Better onboarding and clearer live guidance.	Product	Shipped
Reports: completed-only code, redacted screenshots, export formats	Product	Reports include only code for completed steps, 2-5 redacted screenshots, and PDF/text/.log export.	Accurate logs, privacy-preserving evidence, and portable records.	Product	Shipped
